

Michel Dion, Director General of the Sustainable Aviation Technologies Initiative of Canada (INSAT), is pleased to announce the appointment of Julien Caudroit as Director of Communications and Business Development.

With nearly 10 years of experience within various organizations in the Canadian and Quebec innovation ecosystem, he brings significant knowledge and experience in managing such organizations and the aerospace industry.

Over the past years, Julien has held the position of Vice President and Associate at Innovitech, an innovation consulting firm, and has served in various leadership roles within organizations such as the Consortium for Aerospace Research and Innovation in Quebec (CRIAQ), the Consortium for Aerospace Research and Innovation in Canada (CARIC), the Green Aviation Research and Development Network (GARDN), the IRT Saint Exupéry Canada (Canadian Antenna of the Toulouse Technological Research Institute), as well as in other sectors such as with MEDTEQ+.

Julien has also worked in governmental and international contexts, with several experiences within the United Nations and at Investissement Québec. He has also served on several committees and boards of directors.
